

International Career and College Counselling (IC3) Regional Forum

7th April 2018, Dehradun, Welham Boys School

Survey on Computer Science Education in School

Talk by Prof. Ashish Sureka on "Computer Science in School and College"

Role or Job Responsibility: _____

Organization: _____

SD (Strongly Disagree), D (Disagree), N (Neutral), A (Agree), SA (Strongly Agree), DN (Don't Know)

	Question	SD	D	N	A	SA	DN
1	Computer Science should be taught in every school like Mathematics and Science						
2	New pedagogies, approaches and technologies are needed to implement computer science education in schools						
3	Investment in required hardware and software makes computer science education implementation challenging and equitable in schools						
4	Computer Science teacher development, training and certification should be made more rigorous and standardized						
5	School partnership with colleges and universities is needed to improve computer science education implementation within schools						
6	There is a perception amongst school students that computer programming is hard and are afraid to try it
