

IGI Global Fair Use Guidelines for Authors

This document sets forth the policy of IGI Global (“IGI”), publisher of the imprints “Information Science Reference”, “Medical Information Science Reference”, “Business Science Reference”, “Engineering Science Reference”, “IGI Publishing”, “IRM Press”, “Information Science Publishing”, and “CyberTech Publishing”, regarding an author’s fair use of manuscripts submitted to, copyrighted by, and published by IGI Global.

Prior to submitting final manuscripts to IGI Global for publication, the author must assign to IGI all rights, title and interest in and to the manuscript, including ownership of the entire copyright in the manuscript. The foregoing agreements of the author are set forth in the Author’s Warranty and Transfer of Copyright Agreement (the “Agreement”), which each author must sign prior to IGI’s acceptance of any work for publication. The Agreement is important in two respects. First, the “author’s warranty” provides IGI with the necessary assurances by the author that the manuscript is original, does not infringe upon the rights of any third party, has not been previously published or submitted for publication previously, assigned, licensed or otherwise encumbered, and is offered in good faith for the benefit of one or more academic disciplines and scholarly pursuits. Second, the “transfer of copyright” is the author’s acknowledgment that once accepted, the manuscript becomes the property of IGI and that the author agrees to execute all documents necessary for IGI to perfect its ownership of the entire copyright in the manuscript. Under no circumstances will IGI publish any submitted manuscript without the author’s name and affiliation attached to the submission.

By signing the IGI Author Warranty and Transfer of Copyright Agreement, the author acknowledges, understands and agrees that:

1. The author retains the rights to any intellectual property developed by the author and included in the chapter/journal article including, without limitation, any models, theories, or conclusions formulated by the author. While the author may use any and all thoughts and research results developed or accumulated while working on a manuscript, and may rewrite, update, and re-title them for use in other publications, the author CANNOT use the verbatim text of the manuscript or any part thereof that has been copyrighted by IGI without first obtaining the written permission of IGI, by submitting the Reuse form attached hereto as Exhibit “A” and made a part hereof.

By completing and submitting the IGI Global Reuse Request Form appended to this Fair Use Policy, author requests the following:

2. The author may request permission to post a copy of their chapter/journal article that has been copyrighted by IGI on the author’s employing institution’s secure university Website for use by his/her students in nonprofit educational institutions, provided that (a) there is no charge to the student to access the link and the posted copy includes the IGI copyright information and IGI Website address (see sample below) and (b) prior to posting the manuscript, the author has secured the consent of IGI to such use by submitting the form attached hereto as Exhibit “A” and made a part hereof.

SAMPLE: This chapter/paper appears in <fill in publication title here> edited/authored by <fill in name of author/editor here> Copyright 2011, IGI Global, www.igi-global.com. Posted by permission of the publisher.

3. Generally, IGI will consent to the author’s posting of the final version of his/her chapter/journal article in his/her university/nonprofit educational institution archive/repository or on the author’s personal website, provided that (a) the posted copy includes the IGI copyright information and IGI Website address (see sample below) and (b) prior

to posting the manuscript, the author has secured the consent of IGI to such use by submitting the form attached hereto as Exhibit “A” and made a part hereof. A personal webpage does not include a webpage that is part of an open access society or network, such as researchgate.net or SSRN. Permission will not be granted to post any version of your IGI Global copyrighted chapter to such sites.

SAMPLE: This chapter/paper appears in <fill in publication title here> edited/authored by <fill in name of author/editor here> Copyright 2012, IGI Global, www.igi-global.com. Posted by permission of the publisher.

A final, typeset pdf will be returned to the author for approved posting. Author pre-prints may not be posted.

4. Generally, IGI will consent to the author’s republication of the author’s chapter/journal article that has been copyrighted by IGI and that appears in IGI publications, provided that (a) the manuscript is being republished in a work that is edited/authored by the same author and (b) prior to publishing the manuscript, the author has secured the consent of IGI to such use by submitting the form attached hereto as Exhibit “A” and made a part hereof. In addition to the foregoing requirements for consent to republication, the republished work must acknowledge the original publication where the material was published as follows:

This chapter/paper appears in <fill in publication title here> edited/authored by <fill in name of author/editor here> Copyright 2012, IGI Global, www.igi-global.com. Posted by permission of the publisher.

5. Notwithstanding the foregoing, IGI copyrighted materials CANNOT:

- be posted on open access sites for free download and distribution. Because IGI Global has signed vendor agreements for distributing its publications, we are limited in the instances we are contractually allowed to grant authors permission to post or distribute their work for which they have assigned copyright to IGI Global. For this reason, IGI Global will NOT grant permission for the posting of its copyrighted material on open access sites such as Researchgate, Xarchiv, Academia.edu, or SSRN, or society-sponsored sites.
- be used in a coursepack without first securing the consent of IGI to such use by submitting the form attached hereto as Exhibit “A” and made a part hereof;
- be copied and distributed for any monetary consideration without first securing the consent of IGI to such use by submitting the form attached hereto as Exhibit “A” and made a part hereof;
- be used without citation of original use; or
- be given to a commercial third party to post, copy, distribute, sell or give for free or for any monetary consideration .

IGI’s goal is to participate and support the research community as long as its investment in and ownership of published manuscripts are respected by the research community and IGI’s authors and editors. In order to protect the IGI investment in its publications, in the case of multiple chapter authors from the same institution, no more than 30% of the total number of book chapters will be authorized for posting at that site and will be determined on a first-come, first-serve basis.

Should you have any additional questions about IGI copyrighted materials, please feel free to contact Ms. Jan Travers, Director of Intellectual Property and Contracts at jtravers@igi-global.com.

Upon execution of this form, it becomes a legally binding contract. Therefore, please read carefully before signing. You have the option of signing digitally in Acrobat, saving a copy and then emailing to jtravers@igi-global.com or printing out a copy and completing in ink and returning by postal mail or fax to IGI Global. Instructions on how to create a digital signature can be found at <http://www.igi-global.com/Files/AuthorEditor/DigitalSignatureInstructions.pdf>

Request from Author for Reuse of IGI Materials

IGI Global ("IGI") recognizes that some of its authors would benefit professionally from the ability to reuse a portion or all of some manuscripts that the author wrote and submitted to IGI for publication. Prior to the use of IGI copyrighted materials in any fashion contemplated by the IGI Fair Use Guidelines for Authors, the author must submit this form, completed in its entirety, and secure from IGI the written permission to use such materials. Further, as a condition of IGI providing its consent to the reuse of IGI materials, the author agrees to furnish such additional information or documentation that IGI, in its sole discretion, may reasonably request in order to evaluate the request for permission and extent of use of such materials.

IGI will consider the special request of any author who:

- Completes, signs and returns this form agreeing to the terms; and
- Agrees that unless notified to the contrary, only the final, typeset pdf supplied by IGI Global is authorized to be posted (no pre-prints or author's own file.)

Title of article/chapter you are requesting: Improving Logging Prediction on Imbalanced Datasets: A Case Study
 Book Title and author/editor where this IGI material appears: Sangeeta Lal, Neetu Sardana, Ashish Sureka.
 International Journal of Open Source Software and Processes (IJOSSP) 7 (2016): 2

Purpose of request (where this material will appear):

- Posted on a secure university website for your students to access in support of a class. (Posted paper must carry the IGI Global copyright information as outlined above.)
- Posted in a university archive. The Website address is: http://_____
- Posted on a personal Website: The Website address is: http://www.ashish-sureka.in
- Republished in a book of which I am the editor/author. Book title of proposed book: _____

Publisher of proposed book: _____

- Other purpose (please explain): _____
- _____
- _____

With your signature below, you agree to the terms stated in the IGI Global Fair Use Guidelines. This permission is granted only when IGI returns a copy of the signed form for your files and the manuscript pdf.
